

Unsolicited telephone sales calls are a public nusiance. Allowing an individual to invade a home, by making a telephone call is an invasion of privacy. It is not an abridgement of free speech. Any individual has the right to say what they please. I should have the same right to not listen. I excercise my right to not listen by subscribing to the state "no-call" list. Please do not take away my right to not listen by gutting the no-call law.
